ABOUT KATRA

Katra or Katra Vaishno Devi, as it is popularly known, is a small town in Reasi district in the union territory of Jammu and Kashmir, India, situated in the foothills of the Trikuta Mountains, were the holy shrine of Vaishno Devi is located. It is located 42 km from the city of Jammu. Katra is the base camp for the Yatra to the Holy Shrine of Shri Mata Vaishno Devi Ji. People travelling to visit the shrine have to find accommodation in Katra and then travel 14 km to Vaishno Devi Ji on foot, horseback or by a helicopter. Katra serves as a jumping-off point for one of the world's great pilgrimages. Indian spiritual legend says that those who visit the holy cave shrine of Mata Vaishno Devi will be granted any wish.

ABOUT ORGANIZATIONS

Agricultural Research Council of Nigeria (ARCN) is a public entity placed under the Federal Ministry of Agricultural and Rural Development. It is a government body that regulates agricultural research in Nigeria. Its head quarter is at Mabushi, Abuja, Nigeria and seeks to develop a dynamic agricultural research network for Nigeria's agricultural sustenance and export, improve the quality and quantity of produce for consumption and export and increase food security by contributing to the establishment of sustainable agricultural growth and development in Nigeria. ARCN is responsible for the coordination of agricultural research activities in Nigeria. It works in collaboration with CORAF to generate research solutions that are not only adaptable to Nigeria but also to the entire West African region.

Shri Mata Vaishno Devi University, commonly referred to as SMVD University or SMVDU, is a university on an 470-acre (190 ha) campus located near Katra, Jammu and Kashmir. It is situated near the shrine of the Mata Vaishno Devi, after which it is named. The university is fully residential and provides technical education in the field of science, engineering, management, philosophy and other subjects of contemporary importance. With the focus on higher learning and research, SMVDU has established itself in the league of eminent institutions of learning in the country.

SMVDU is located at a distance of 45 km from Jammu Airport and 14 km short of the holy town of Katra, the university is situated on a plateau surrounded by mountains on three sides in the foothills of the Trikuta Range where the shrine of Mata Vaishno Devi is located. It is a self-contained township with most facilities available in-house.

National Agriculture Development Cooperative Ltd. (NADCL) was established under Self-Reliant Cooperative Act-1999 by Registrar Co-operative with a mission to promote, disseminate and mutual exchange of scientific information of Agricultural Science among the scientific diaspora and stakeholders. The NADCL was primarily established to serve as a bridge for communication between agriculture scientists, extension workers and farmers. Blending of the influences of these three, bring an effective result in the doubling of farmer's income. Needless to say, the National Agriculture Development Co-operative Ltd. desires to have your co-operation in order to develop atmosphere conducive to aware farmers about innovative agriculture practices to yield best results for the progress of the farming community. The NADCL already organized a number of conferences, trainings and awareness programs etc.

Department of Agriculture was established to enhance the income of farmers and to generate employment in agriculture and allied sectors. The strategy adopted for this purpose is to increase production and productivity of the crops and to enable farmers to diversify their crop production so as to take advantage of market opportunities. The main role of the department is to help farmers to adopt better technology and to facilitate establishment of infrastructure for farm production and marketing. New avenues are being explored for investment. The department is also promoting diversification of agricultural crops to motivate farmers to move towards low volume high-value crops like vegetables, medicinal plants and niche products like; saffron, rajmash, zeera, mushroom etc. Agriculture has, after a very long time, occupied centre stage in the economic and administrative discourse in J & K at a time when all seemed lost due to dwindling interest of the younger generation in agriculture activities. The concerted efforts of the Agriculture Production Department have triggered a new hope among the people, which promises profitability and dignity in the agriculture as an occupation.

Department of Sheep Husbandry came into existence in the year 1962 with the main objective of promoting sheep and goat development in J & K having sufficient scope and potential owing to bountiful pastures and meadow lands presenting nutrient grasses and herbage for the pastoral activities. The department so established was headed by a Director with a Deputy Director for each Jammu and Kashmir divisions. In early seventies a major expansion took place with the creation of joint Directors, Deputy and Assistant Director level officers.

In the year 1982, the Department of Sheep Husbandry was bifurcated into two parts and accordingly two separate Departments of Sheep Husbandry one for Kashmir and another for Jammu came into existence. As a result of this bifurcation, the sheep husbandry sector got sharp focus at provincial level. The Department of Sheep Husbandry Kashmir, having its area of operation in Kashmir Division comprising of ten districts of Kashmir Valley witnessed vast organizational expansion. At present, the Department has a staff organization consisting of various subject matter specialists and two major line organizations one looking after the farms and the other field extension activities. Each organization is headed by a Joint Director. In the area of farm management, the Joint Director (Farms) is assisted by senior level officers to run the nine farms established so far in Kashmir Division. Similarly, to implement and monitor various field programmes/activities, the Joint Director (Extension) is assisted by eight District Organizations each headed by a District Sheep Husbandry Officer and 10 Sheep and Wool Development Organizations.
CAAAAS-2020 will provide the worldwide multi-disciplinary discussion for scientists, teachers, growers, product manufacturers, students, and marketing personals to grip and share a various range of basic studies, techniques and experiences. In this context, deliberations in the international conference by eminent speakers may provide a more sustainable approach to innovations in plant and animal sciences. The conference will present interdisciplinary plenary lectures, invited talks and parallel oral/poster presentations during concurrent sessions on focused topics related to plant science, animal science, chemical science, physical science, technology and management.
